CAREER GOAL

My main goal in my career is to improve my front-end skills. However, I am also not afraid when I have to touch the backend.

I feel deep satisfaction when I create functional and beautiful web applications. Which are adjusted to work with different platforms and devices.

During my professional road, I met a lot of difficult lines of code, impediments, and strange architectures. But I am never afraid when I see new challenges. I am ready to be better professional every day.

EXPERIENCE

FRONT - END DEVELOPER

Makimo | March 23 - Current

I was responsible for coding web applications using React.js and Angular frameworks. I used several tools like Vite or Tailwind. I managed an internal project that became a product for potential customers. Wrote articles for the company blog about technical leadership and coding. I recommend reading it in your spare time.

SENIOR WEB DEVELOPER

Deloitte Digital | July 21 - March 23

I have implemented new features (loyalty programs, appointments tools) for websites in HTML, CSS, SASS, JavaScript, and PERL. I was responsible for deliverables of projects and my web developers team. I was involved in onboarding new persons from other parts of world. I was part of the recruitment interviews.

WEB DEVELOPER

Deloitte Digital | October 16 - July 21

I have implemented new features (loyalty programs, appointments tools) for websites in HTML, CSS, SASS, JavaScript and PERL. I was responsible for the management, implement the new content and new sections in the website, also programming the Newsletters. I took care of developing and managing internal tool.

DEPUTY TEAM LEADER

Material in Motion| The Netherlands | May 16 - Sept 16

I took care of preparation and delivery of parts necessary for building servers for Google. I was responsible for management and monitoring employees.

WEB DEVELOPER (Intern)

Loud Cloud | Oct 15 - Dec 15

I was responsible for working on a range of projects, programing appealing websites and interacting with graphics.
